Engineer to protect all adjacent lands, and all ground and surface waters from contamination by direct and indirect migration of sands, silts, mud, debris, chemicals and other such pollutants from jobsite through use of specified materials. Such measures shall include, but not be limited by enumeration to:

1. Construction and maintenance of sedimentation basins, or use of sedimentation vessels.
2. Construction and maintenance of erosion control barriers.
3. Construction and maintenance of erosion mats.
4. Construction and maintenance of surface runoff diversion channels around construction site.
5. Construction and maintenance of temporary and permanent drainage structures and facilities.

If possible, construction shall be scheduled for times of year when erosion hazards are minimal. Natural vegetation shall be retained and protected in all areas not designated for improvements or earthwork.
4. Any soil or dirt piles which will remain in existence for more than 7 consecutive days, whether to be worked during that period or not, shall not be located within 25 feet of any roadway, parking lot, paved area, or drainage structure or channel (unless intended to be used as part of erosion control measures). Temporary stabilization and control measures (seeding, mulching, tarping, erosion matting, barrier fencing, etc.) are required for protection of disturbed areas and soil piles which will remain unworked for a period of more than 14 consecutive calendar days.

C. Drainage Measures

1. Drainage provisions shall be designed to contain increased runoff resulting from development of site and / or disturbances to natural vegetative cover, during and

after construction activity. Drainage shall be conveyed to nearest adequate public facility. Water may not be discharged in manner that will cause erosion or sedimentation of site or receiving facility.

shall be immediately and completely removed by scraping, sweeping, shoveling or other such method (except flushing). Any accumulations not requiring immediate attention shall be completely removed at least once at end of each workday.

- C. Sediment cleanup shall follow COMM 65.22 (2):
 - 1. Mechanical erosion control measures shall be cleared of sediment by time accumulation reaches 50% of height of control measure.
