The Proposals are due on or before **2:00 p.m., Tuesday, February 24, 2015**. No proposal bond or performance bond is required for this project.

GENERAL INFORMATION

Dane County is inviting proposals to provide Construction Documents for the creation of a new loading dock at the North side of the Veterans Memorial Coliseum at the Alliant Energy Center (AEC). The new loading dock will need to be able to accommodate the loading/unloading of two semitrailers at a time. The Coliseum was originally constructed between 1965-1967 as a three story multi-use structure with approximately 106,600 square feet of floor space and is the primary concert performance venue for the AEC. In addition the building hosts sporting events, livestock shows, product shows, and the circus which would all need to be accommodated for by the new loading docks. The scope of work will include architectural design as well as changes to the existing structural, mechanical, electrical, and plumbing systems. Civil/site alterations will also be required to accommodate the establishment of two new loading docks. A proposer's facility tour will be held on Tuesday February 17th, 2015 at 10:00 a.m. at 1919 Alliant Energy Center Way starting in at the lobby of the Administration Building. REQUESTED SERVICES AND BUSINESS INFORMATION

1. GENERAL INFORMATION

- A. Dane County is inviting proposals for professional architectural and engineering (A/E) design services to provide Construction Documents for the creation of a new loading dock on the North side of the existing Veterans Memorial Coliseum at the Alliant Energy Center (AEC). The loading dock will improve efficiency for loading/unloading of equipment by musicians and entertainment groups performing at the Coliseum. The loading dock needs to be able to accommodate the loading/unloading of two semitrailers at a time. Only firms with capabilities, experience & expertise with similar projects should obtain this Request for Proposals document & submit Proposals.
- B. Constructed between 1965- 1967 the Veterans Memorial Coliseum is a multi-use three story structure with an approximate gross area of 106,600 square feet. The building is located on the northern corner of the Alliant Energy Center property and is the most prominent visual element on the AEC campus due to its distinctive folded plate white roof when viewed from the major Madison arterial of John Nolan Drive. The Coliseum serves as the major concert performance venue for the Alliant Energy Center and in addition hosts numerous indoor sporting events (currently hosting a hockey league), livestock shows, product shows, and the circus. The building has three primary floor levels serving the Coliseum seating along with a wide perimeter circulation corridor that can handle large crowds. There are two major lobbies (the west side lobby is where ticket sales are conducted) located on opposite sides of the building. Additional public amenities include elevator access, concessions, offices and luxury suites. The Bob Johnson Center, housing locker rooms for hockey, was built in more recent years and is connected to the Coliseum on the south side of the building. The primary service entrance, the proposed area for the two new loading docks, is on the north side of the building. Creation of the new loading docks will require the establishment of new grades at the exterior of the building. The adjacent existing service entrance can accommodate semi tractor-trailer rigs for loading/unloading, but there is no loading dock presently available that would allow a forklift to enter the trailer bed at-grade.
- C. Access to the interior rooms and areas of the Coliseum will be made available to the selected A/E personnel throughout the design process and will be coordinated with the Dane County Project Manager/AEC staff. Electronic scans of the original building drawings will be made available at the start of the project.
