

**Division of Historic Preservation – Public History
Office of the State Archaeologist
List of Archaeological Consultants
Last Update – October 24, 2011**

This list contains individuals or organizations that have indicated interest in conducting archaeological research in Wisconsin on a contractual basis. They have certified that they are qualified archaeologists under the Secretary of Interior's professional qualification standards (36 CFR 61, Appendix A.).

This list is not inclusive. There may be other qualified individuals or organizations that have not contacted us. Contractors should contact the Register of Professional Archaeologists as well as Historic Preservation offices in neighboring states for additional listings. Contact information for additional listings is located at the end of the list.

How the list is organized

Names are listed alphabetically and by geographic placement.

- **ALPHABETICAL LISTING, pages 2-7**
- **GEOGRAPHICAL LISTING, pages 8-16**
- The geographical placement list is based on the location of the institution or office facility. It **does not** necessarily reflect the areas in which an archaeologist will work.
- After each listing, areas of expertise are noted (prehistoric and/or historic archaeology).

Representation Conditions

This list is provided as a public service. **It does not constitute an endorsement for any, or all, of these individuals or institutions.** Nor is it a guarantee of satisfactory work. Standard business practices should be used in contracting for services with these individuals and institutions. Credentials and work history should be checked. Former clients should be consulted. The Division of Historic Preservation – Public History does not remove names from this list unless requested by the individual or institution concerned.

Federally permitted or assisted projects

- Federal or federally permitted or assisted projects must be conducted by a qualified archaeologist as defined in "**Archeology and Historic Preservation: Secretary of the Interior's Standards and Guidelines.**"
- When reviewing archaeological projects, the Society's Division of Historic Preservation – Public History applies the "**Wisconsin Archaeological Survey Guidelines for Conservation Archeology.**"
- To conduct archaeological research on public lands owned by the state and its political subdivisions a permit from the State Archaeologist is required.
- To conduct archaeological research on federal lands, a federal (ARPA) permit is needed.
- All artifacts and information collected during the course of federal or federally-assisted projects must be curated in accordance with federal regulation 36 CFR Part 79, which is entitled "**Curation of Federally-owned and Administered Archeological Collections.**"
